

School group and closed group bookings at Loxdale English Centre

Our short courses are designed to positively engage young learners and develop their self-confidence. All five language skills are taught on our courses but the emphasis is very much on communicative skills and the development of fluency, accuracy and confidence in using the English language. Students also learn about British culture, traditions and etiquette.

Each short course that we run is different. Usually the focus is on English with elements of British culture, however groups have requested courses to include subjects such as literature, films, Shakespeare, history, the media, art and many more. We are confident that we can work with you to create a stimulating and interesting course for your students.

Key features of our school and group courses:

- Groups welcome between September and June
- Minimum 11 students in a group
